PROFESSIONAL SUMMARY STATEMENTS

My prime objective is to obtain a position where my **leadership** and strong *interpersonal* skills can be used as a positive contribution to any company or organization.

WORK EXPERIANCE

Micro Center / Build Your Own Specialist FEB 2016 - PRESENT

As a Build Your Own and hardware specialist of all things new to tech in the PC world, I help gamers and professionals alike build computers that match their caliber. I've helped everyone from an up and coming Twitch Streamer, to the Adobe suite professional. I pride myself on knowing what the latest and greatest is. From Intel to AMD and Nvidia to Radeon, I do it all.

Pullr, LLC. / Community & Creative Director NOV 2013 - MAR 2015

At Pullr, I played the role of a few different positions to fill our small staff. In about 2 years' time, we were able to build and fabricate an application that not only caught the eyes of Gamers and Streamers, but everyone looking to raise money for a worthy cause. With the efforts of Pullr, we helped to raise over \$800,000+ for various charities across the globe.

IBT Media Inc. / Contributing Writer OCT 2013 - AUG 2014

Writing for a subsidiary of the IBT Media group, I wrote for two technology based fan sites. I played on both ends of the spectrum writing about Xbox, Microsoft and Windows. Shortly after that I was brought on to their Apple website to write about Mac, iPhone & OSX.

Freelance / Graphic Designer FEB 2007 - PRESENT

During my off time, I spend my time working on side projects that keep my creativity sharp. This includes but is not limited to: Web Design, Graphic Design, UX/UI Design & More.

EDUCATION

Cisco Networking Academy
Computers & Networking (CCENT / CCNA)
Loring - Maine (2011)
